Home > Browse Actions > Work inequalities in later life redefined by digitalization (DIGI-net)

Description | Management Committee | Main Contacts and Leadership | Working Groups and Membership

Description

The aim of this Action is to overcome critical gaps in conceptual innovation on the influence of digitalisation on work inequalities in later life, in order to address the research-policy disconnect and tackle work inequalities in later life redefined by digitalisation. The Action will enhance scientific knowledge by integrating the different disciplines and schools of thought, by developing collaborations with public policy officials, international policy bodies, non-academic professionals, civil society NGOs, trade unions, management of organisations and older workers themselves. Expected deliverables include: a) the creation of a web-site; that will act as a platform for the Action and become an international 'hub' for the study of ageing at work in the era of digitalization, by sharing and publishing knowledge, connecting researchers, stakeholders and activists in the field; b) the creation of a depository database of scientific measures and tools for the assessment of inequalities and challenges of aging and digitalization, as well as for good practices. Policy reports will be posted in order to make links outside the research community to address policy makers and stakeholders; c) the facilitation of research and dissemination events, including Short Term Scientific Missions (STSMs) and scientific Training Schools (TS) for Young Researchers and Innovators (YRIs) and established researchers, public conferences and policy workshops hosting experts and relevant stakeholders; and d) a series of publications including scientific reports, conference proceedings, academic publications, collaborative recommendation papers derived from Action
